Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6,9-11 and 35-41 drawn to a dual flush system, classified in class 004, subclass 325.
- II. Claims 15-16, drawn to a flush lever, classified in class 004, subclass 405.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination II has separate utility such as in the absence of I. See MPEP § 806.05(d).

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

The examiner failed to include the above requirement in the previous letter.

The response of 3/27/06 fails to comply with the requirements of 37 C.F.R. 1.121 in that all claims that are submitted as un-amended should employ the status identifier “(previously presented)”. Claims 35-41 appear to be new and should employ –(new)-as a status identifier rather than “(currently amended)” and should not employ underlining. Further, claims must be on dedicated sheets, that is claim 1 should be on the claims sheet, not on the comments sheet. Finally, applicant is required to make a definitive statement as to which claims he deems readable on the elected embodiments.
